

Building Envelope Symposium

September 21, 2010

Location:
Northern Illinois University
Hoffman Estates - Rm. 206
Chicago, IL

Program:

Morning Session 8:00—11:30 am

Corporate Roof Asset Management Seminar

This program focuses on how to solve roofing problems through awareness and provides valuable information for completing a successful project. You will learn about the causes and effects of conditions that cause roof systems to become “short-lived” and how to implement projects that will yield the greatest “Return on Investment” for your Roof Asset Management Program.

Managing Roofing Projects – “Rules of Engagement”

Determine the best “fit” for your organization as it pertains to quality, price, delivery, and return on investments.

Afternoon Session 1:00—4:30 pm

Engineered Management Systems (EMS) Seminar

This program will describe how to develop an Asset Management Program for facilities with an emphasis on Building Envelope Systems (exterior facades, windows, roofs, foundations and parking structures). By developing such a program, facility managers can plan and forecast their operational and capital budgets for their organization.
